

My heart journal

*An activity journal for young people
with a congenital heart condition*

Sponsorship packages

Sponsoring one of our events or initiatives, or our bi-annual magazine Pulse, allows us to spend more money on pioneering medical research that benefits patients as soon as possible. Heart Research UK is the charity dedicated to your heart. We're taking on heart disease, and we need your help.

We have a range of exciting events, initiatives, projects and collateral that you can sponsor, which will help enhance your brand profile while helping us to fund our medical research and community projects.

Sponsorship is a great way to support us while developing deeper connections with your target audiences, motivating your employees and achieving your sustainability and charitable objectives.

You could sponsor our bi-annual magazine, Pulse, which is sent to all of our supporters, as well as every Subway store and cardiac centre in the UK, or one of our exciting fundraising events, which gives you the opportunity to increase your brand profile support our life-saving work, and get involved yourselves!

You could sponsor our masterclasses, where your company name can be put against our specialist training for surgeons and clinicians in the UK.

These are just a few ideas - we understand that each company has different business objectives, so we will work with you to create a bespoke package that meets these needs.

To discuss sponsorship opportunities, please contact Isabel at corporate@heartresearch.org.uk or call 0113 234 7474.
